

## Speaking with Doctors – Bullet Points:

- The Acuscope System is the Original Microcurrent BioTechnology, released in 1978. It remains the most advanced in that it is the only interactive (impedance-monitoring; bio-feedback modulated) neuromuscular microamperage stimulation system.
- Our Physical Therapists and Physical Therapy Assistants are highly skilled Operators we refer to as BioTechnicians; one might call them BioElectricians who can restore the bioelectricity to full capacity and good conductivity.
- We can offer your Patients these results: a Series of Treatments will significantly improve the condition of the “wiring” of the Nervous System and the electrical properties of Connective Tissue (muscle-tendon-ligament-fascia).
- Why is this important? Eliminate pain . . . without blocking, masking; or potentially harmful side-effects of medications, injections and/or other invasive methods of therapy.
- Successfully addresses the majority of Neuro-Muscular Pain Syndromes (Joints, Backs, Necks, Hands, Feet); not necessarily used for disease or organ dysfunction.
- Produces speedier recovery from a traumatic Injury; both acute (recent, immediately after an accident); and chronic (long-standing, unresolved) pain syndromes.
- Doctors will be able to prescribe less analgesic, symptom-blocking pain medications . . . by helping the Patient’s body to naturally eliminate the cause of pain.
- Provide lasting Stress-Reduction without mentally disabling drugs (with dangerous psychotropic side-effects).
- Helps to resolve many serious Nervous System disorders (including Stroke; Brain Injury; Traumatic Paralysis) by improving nerve conduction, restoring “lines of communication” from brain to body.
- Can reduce annoying symptoms associated with Parkinsons, MS, Fibromyalgia by improving general circulation of nerve current and reconfiguration of conducting signal.
- Pre-Op Preparation; Post-Op Rehabilitation = Faster Recovery, less discomfort. Insures the success of any type of surgical procedure.
- Produces Improved Sleep. Overcoming Sleep Disorders by naturally calming the nerves. (Think of all the people who are now dependent on drugs like Lunesta with a long list of potentially horrific side effects.) Safe, Non-Invasive Brainwave Modification . . . a conditioning process that can last for life-long benefit.

- CNS (Central Nervous System) Benefits. Improved circulation of Central and Peripheral Nerve Signals is conducive to regeneration of tissue, cellular self-repair. Brain and body improvement is evident. General health, mental clarity, facial appearance.
- All Circulatory Systems benefit from improved Nerve Conductivity (cardio-vascular, lymphatic, digestion, elimination).
- Doctors receive Reports from Bio-Technicians that clearly track Patient progress. Non-Invasive Bio-Feedback reveals Bio-Impedance Evaluation. Reduced resistance in the Circuitry = improved conductivity.
- Unique Real-Time Bio-Feedback Modulation . . . Provides Operator Precision in accurately administering Neuro-Muscular Microcurrent.
- Objective SOAP NOTES PROVIDED. Improved conductivity = results Patients will Feel and Acuscope Technicians can Report to you.

**Doctor:**

Would you like to offer Resolution of Unresolved Pain Syndromes which previously could only be addressed by indefinite Prescription of Pain Meds; Surgery; or no solution but “live with it”?

Do a Search of your Files and bring back those Patients for an Office Visit Reevaluation with you.

Our Service Requires your Prescription for application of a Physical Therapy Electrical Stim Modality; and Neuro-Muscular Re-Education Procedures. Insurance coverage for Standard Billing Procedure Codes applies.

Patients will require Office Visits with you to oversee their Case. A sequence of timed Office Visits with you will allow the monitoring of Patient progress in order to reduce and eliminate Pain and Stress Medications.

Using Acuscope-Myopulse Microcurrent and offering valuable general Healthy Lifestyle Education will insure success of therapy.

What exactly can Acuscope Therapy do for the Patients of Specific Medical Physicians?

**Neurologist** – an alternative solution to current diagnostic methods for discovery of nerve conductivity. Avoids the painful method of doing a NCS (Nerve Conduction Study) or needle EMG (Electro-Myography) for muscle condition diagnosis. The Neurologist can provide 5 – 7 Office Visits to monitor the progress of microcurrent neuro-muscular rehabilitation.

**Surgeon** – Pre-Op Preparation; Post-Op Rehabilitation = Faster Recovery, less discomfort. Improved condition of Neuro-Muscular BioElectricity insures the success of any surgical procedure. Reduced pain meds. May possibly serve to avoid unnecessary surgery when in the Patient's best interest. Will produce significantly faster tissue repair following all types of necessary surgery. [**Sports Medicine; Orthopedics**; etc.]

**Podiatrist** – Are You Prescribing Medicine for your Patients' Foot Pain? Would you like to provide a Service that helps improve circulation and tissue repair in nerves and connective tissue structures below the knees? Send your Patients for Treatments that will improve Nerve Conductivity from Head to Toes. A whole body treatment that greatly benefits the majority of foot conditions seen in Podiatry. Reduces constricted lines of communication from Lower Back Spinal Nerve Roots down to the Feet. Maximizes soft tissue cellular repair. Reduces inflammation in Plantar Fasciitis; restores cellular electrical potentials to injured muscles, tendons, and ligaments causing speedier tissue repair. Pre-Op Preparation; Post-Op Rehabilitation = Faster Recovery, less discomfort. Insures the success of any surgical procedure. Stress Reduction promotes enhanced rehabilitation. Gets them back on their feet sooner, pain-free, without lingering inflammation, and completely recovered.

**Gynecologist** – Pre-Natal Preparation. Post-Birth Recuperation. Calm, Relaxed Nerves before Pregnancy and after the baby is born. Can provide rapid resolution of birth trauma pain syndromes, eliminate back pain; restore hip joint to pre-birth condition far sooner.

**Chiropractor** – What more can you do for your patients with lingering joint pain? Refer your Patients whose joint and extremity pain syndromes persist unresolved. Skeletal alignment procedures combined with microcurrent produces vastly improved Nerve conductivity and promotes damaged myofascial connective tissue repair. A one month Acuscope-Myopulse Series of Eleven together with weekly or bi-weekly adjustments will make you the hero of your community!

**All Types of Practitioners** – Referrals by your Patients' friends, family and co-workers will multiply. Oversee the cases and your compatible methodologies will produce even greater benefits.

### **Think Team effort!**

A Series of One-Hour Treatment Sessions are required to produce results; a time-consuming therapy that you would not want to add to your office procedures. However, a treatment program that includes Acuscope-Myopulse Microcurrent can enhance the lives of all of your Patients! Their loyalty and gratitude will come back to you ten-fold for referring them to us.
